

iNet CellBridge

The Next Generation of Reliable Remote Communications

Outperforms Crown & Cell Boosters

Available on the only private licensed LTE network dedicated to the O&G Industry.

- Brings the cell site to the well pad and eliminates connectivity-down-time due to lost signal.
- Simple, quick install that does not require a crown climb.
- Outperforms standard boosters, giving you broader cell coverage with fewer devices.
- Seamlessly integrates with other iNet products and services - comes with advanced monitoring services.
- Single device is enough to cover your entire area of operation.

Benefits of Working With iNet

- Reduced Costs and Increased Return
- Latest Plug-and-Play Devices
- Customized Solution Package
- 24/7 Service and Support
- 130,000+ square miles of coverage
