

iNet Gate Guard Phone System

Increase On-Site Security

Place the Gate Guard Phone at the entrance of any well pad to allow visitors to call the Company Man or Tool Pusher, notifying them of their arrival.

The Gate Guard Phone is a self-contained, free-standing, solar powered outdoor intercom station that interfaces and interoperates with iNet's existing intercom systems.

Key Features and Benefits

- Wireless interconnectivity
- Ruggedized outdoor application with corded handset
- Integrated Solar charged DC power plant – no external or facility power source required
- Integrates with iNet intercom systems
- Easily relocated on well pad
- Place/receive calls to/from any intercom station on the system (not limited to Company Man and Tool Pusher)
- Allows Visitors/Contractors to notify onsite personnel of arrival
