

Explore the largest 4G/5G private LTE network in the Continental U.S.

Our network footprint has been built across four major shale basins in Texas, New Mexico, Oklahoma and North Dakota.

PERMIAN | BAKKEN | EAGLE FORD | SCOOP/STACK

Looking for Partners in Permian 5G Pilots:

Get 4G/5G LTE coverage on our licensed 700 MHz spectrum, augmented by off-net LTE and VSAT (satellite) for expanded coverage.

- **Over 130,000 sq mi (Roughly size of Japan)**
- Founded in 2011, Houston-based iNet has built the largest private licensed LTE network in the Continental U.S. devoted to remote and distributed field operations in oil and gas and other industries.
- With proactive network monitoring and a field support team at the ready, we deliver the industry's most reliable remote communications solutions.
- Enables traffic segregation to ensure your most critical data takes the fast lane. Unrivaled service level agreements and quality of service.
