iNet supports secure, reliable and high speed industrial 4G/5G LTE communications to smart cities and municipalities in underserved areas of the U.S. Our private LTE services support water/waste water management, traffic support, public works and public safety. We support multiple applications for Municipalities on one common network at an unmatched cost savings.

Why Work With iNet?

Since 2011, iNet has been the O&G Industries go-to provider for secure, reliable and real-time communications and connectivity. Get the same support for your public safety needs.
